

building:careers

Ohorongo Cement is passionately dedicated to offering Namibia locally-produced, world-class cement.

We are a member of the Germany-based SCHWENK family, whose international legacy of quality spans over 160 years.

We decided on a substantial investment through building an environmental-friendly plant in the Otavi/Tsumeb region.

We will cement our position as one of Namibia's chief economic players by boosting economic growth, reducing unemployment, transferring skills, attracting foreign-based Namibians and delivering products of uncompromising quality.

quarry supervisor

Reporting to the Production Manager, the Quarry Supervisor is responsible to manage all aspects of the quarry operation, ensuring efficient production, adherence to all quality requirements and that health and safety regulations are adhered to. This position is Otavi/Tsumeb based.

responsibilities

- enforcement of health and safety regulations throughout the quarry (workers as well as contract staff)
- maintenance planning in quarry and up-keeping of equipment and roads.
- development and management of the quarry process, especially with regard to drilling, blasting and cement composition
- quantity of requested raw materials and constant availability thereof
- continuous improvement

requirements

- B Tech degree in an appropriate discipline and an Incorporated Engineer
- five (5) years experience as a Quarry Supervisor with experience in mine blast hole drilling would be an advantage
- basic knowledge in mine surveys
- knowledge of preventative maintenance
- special knowledge in process flow of the mining industry
- inter-personal, communication, leadership, flexibility and inter-cultural intelligence skills
- must be able to work independently but also in a team

maintenance manager

Reporting to the Operations Manager, the Maintenance Manager will manage, coordinate, and control all maintenance work at the plant, ensuring an efficient and continuous production process. Is furthermore responsible for ensuring safety and health regulations are adhered to and that challenges are pro-actively identified. Makes recommendations for continuous improvements (electrical and mechanical maintenance). This position is Otavi/Tsumeb based.

responsibilities

- enforcement of health and safety regulations throughout the technical and maintenance departments
- maintenance planning
- manpower planning in regard to production issues
- stock levels: recommendations and management of appropriate levels and quality
- cost and budget management
- continuous improvement

requirements

- B Tech degree in an appropriate discipline and an Incorporated Engineer
- an additional relevant technical apprenticeship would be an advantage
- six (6) years relevant experience as a Maintenance Supervisor preferably in a mining or manufacturing environment would be an advantage
- high level of computer literacy, excellent problem-solving, project and time management skills
- knowledge in mechanical, electrical and automation technology would be an advantage
- inter-personal, communication, leadership, flexibility and inter-cultural intelligence skills
- must be able to work independently but also in a team

remuneration

In return we offer competitive income potential, depending on skills and attributes.
